

```
float f;  
int i;  
sampout s=>dac; // connect sample to output  
  
while(1)  
    5.0 => s;  
    rand(20.0, 150.0) => f; // random waiting time  
    f=>i; // cast because our type system isn't finished  
    i:=s => now;
```
